Seminar Description:

Strategies for Assessing and Treating Childhood Stuttering

This seminar is designed for SLP's working with pre-school and school-age children who stutter. The presentation will describe the nature of stuttering onset and development, tools for assessment, and intervention strategies that have evidence to support their use. A portion of this seminar will consist of small and large group discussion and case study presentations.

Course Objectives:

To provide attendees the opportunity to learn strategies to evaluate and treat children who present with dysfluent speech.

Learner Outcomes:

At completion of the course, participants will be able to:

- Describe the nature of stuttering onset
- List risk factors for stuttering persistence/recovery
- Describe a variety of tools used to assess all aspects of stuttering in children
- Discuss treatment planning for children who stutter
- Describe evidence-based interventions for children who stutter

Presenter: Dr. Amie King, Ph.D., CCC-SLP

Dr. King is a faculty member at Southern Illinois University-Edwardsville and teaches a variety of courses primarily related to childhood speech and language disorders. Her research interests are clinically based, involving augmentative and alternative communication in children with complex communication needs and early childhood stuttering.
