

May 2, 2016

Dear School Superintendents, Principals, and Nurses:

Re: 2016-2017 School Immunization Requirements

The Indiana State Department of Health Immunization Division annually reviews and updates the immunizations required for school entry. Changes to the 2016-2017 School Immunization Requirements are as follows:

- Two (2) doses of Hepatitis A vaccine (Hep A) are required for all students entering kindergarten, first, and second grade.
- All other requirements from the 2015-2016 School Year will remain unchanged.

The full list of all school immunization requirements can be found online on the website for Indiana's state immunization registry (CHIRP): <https://chirp.in.gov/>.

Thank you for your work and dedication to protect the health of children in Indiana!

Sincerely,

David McCormick  
Director, Immunization Division  
Indiana State Department of Health
