

How to connect with your students in the virtual world.

In this current global climate, teachers and administrators are being transported into a new 'virtual reality.' Teachers have to discover a new sense of how to connect and communicate with their students, one that is outside the physical space of the classroom. This can feel like you are wearing a virtual reality headset, and you can wonder what is real and what is not.

The word virtual can imply that something is not 'real.' Communicating via video is 100% real. Is it different? Yes, but it is still real. The major difference is the type of 'room' that you are communicating in has changed. The video conference 'room' causes us to behave in distinctly different ways.' There are helpful strategic tools, mindsets, behaviors, and technology that will equip and empower teachers to thrive in their new, very REAL reality.

Before you, 'take-off' into this new reality, join Mike Elliott, from ADVISA for a one-hour webinar, titled: How to connect with your students (& parents) in the virtual world. This experience will be a time to explore video conference and engagement tools in a safe environment so that you can offer excellent and engaging on-line service to your students.

How to connect with your students in the virtual world.

Using Video Conference Tools

Tips and tricks to connect with your students (parents) during this season of virtual teaching

- Tips to starting a meeting via video conference
