Re: Assignment Code Increased Licensure Options

During the past several months, Indiana Department of Education (IDOE) personnel in the areas of educator licensing and curriculum, have reviewed the licensure options for many approved courses at the secondary level. The goal of this effort has been to expand teaching and staffing opportunities in local schools as appropriate. This review has included P-12 standards, course standards and descriptions, teacher preparation standards, and licensure rules.

As a result of this review, additional licensure options are being noted in the Assignment Code that should provide more teaching opportunities for educators and more flexibility in staffing for local administrators, particularly within CTE course offerings and assignments. While this work is not yet completed, the Assignment Code revisions are proceeding quickly, and once the finalized document is posted on the IDOE Educator Licensing webpage, we will send out a notification.
