

*****Save the Date *******“Overcoming the Achievement Gap Trap” training conference with
Anthony Muhammad on October 14**

The Indiana Department of Education has teamed up with Dr. Anthony Muhammad to present a training focused on his seminal work, “Overcoming the Achievement Gap Trap.” Due to ongoing concerns related to the COVID-19 pandemic, Dr. Muhammad will present this content in a virtual format on October 14. Participants will be guided through a learning experience focused on re-thinking the gaps that exist in academic achievement, which are rooted in inequity, and provide tools to address this ongoing issue in a fresh and comprehensive manner. The content of this training is particularly germane to root causes associated with social injustice and pervasive educational barriers.

There is no cost for this full-day training webinar, and registration will be limited. Additional details regarding the event will be released soon.
