Re: IDOE Reorganization

The Department recently restructured some areas in an effort to better meet the service needs of the field. We are pleased to announce at the senior leadership level, Dr. Ken Folks has moved to Chief Academic Officer and Ms. Kelly Wittman will now serve as Senior Advisor. Dr. Mark Keen will be serving as Special Projects Manager in the area of School Improvement. In addition, Mrs. Amanda McCammon is filling the new role of Chief of Workforce and STEM Alliances.

The Department's P-16 area has been restructured. Support Specialists formerly in the P-16 area, now fall under School Improvement *or* the new Workforce and STEM area. Those in the field should reference the updated IDOE [organizational chart](#) and the [contact sheet](#) that follows for updated information regarding content area assistance.
