The Indiana School Safety Specialist Academy presents:

“Severe Weather Awareness”

Presented by:

Sam Lashley
Severe weather can occur any time of year, but statistically Spring and early Summer are the most favored times for damaging winds, large hail, and tornadoes across Indiana. This talk will discuss the ingredients needed to produce severe weather, key features to look for in the sky as precursors to approaching thunderstorms, and safety measures to take when severe weather is imminent. Online resources for staying "Weather Aware" will also be provided.

Sam Lashley was born and raised in Crawfordsville, Indiana and attended Purdue University (Boiler Up!). He graduated in 1991 with a Bachelor of Science degree in Atmospheric Sciences and began his career with the National Weather Service (NWS) in 1993 in Milwaukee, Wisconsin. Sam moved back to Indiana in 1995 and has worked at both the NWS Indianapolis and Northern Indiana offices since that time. Sam accepted his dream job as the NWS Indianapolis Warning Coordination Meteorologist (WCM) in September 2019 and enjoys educating people on weather safety and preparedness.

Cost: There is no cost for this training. Professional Growth Points, CEU’s and Law Enforcement hours will be available.

When: Wednesday, February 24, 2021: 3:00 – 4:00 p.m. (EDT)
